

THE VEEP SPEAKS: BOB HOAG

As I write this, our club president, Bob Noll, is "Truck'n" his way South for a well deserved vacation. Before he departed he asked me as V.P. to do the "Pres ses" section of this outstanding periodical.

Welcome to John Seitz as our 1st social member under the new membership classification voted in at last meeting. Hope this keeps guys in the club who, though they may not be actively flying, can benefit themselves and the club by their participation.

Let's all support Ron and his staff on the up coming contest ... only 11 weeks away at this writing. I learned last year that the funan satisfaction from this project is directly proportional to the effort you invest. I know I had a great return on investment last year.

Going to take orders for club shirts, jackets and patches at next meeting so bring sizes.....

Also, and in closing, as a help to Ron and his conest commttee, we'll be taking 10 min. to address and stamp a bunch of mailings to manufactres for prise donations so, please bring a pen.

CLUB UNIFORMS?

At the next meeting club jackets, shirts and patches will be discussed and orders will be taken. So if you're interested be sure to show up and place an order. The jackets are a dark blue windbreaker (nylon would be my guess) with some kind of thin lining. Just perfect for those cool evenings up at the field. Many members buy a club patch and sew it in the back which looks pretty sharp. Al Bohner has a supply of the large patches and will be glad to sell you one for \$5. Club shirts werediscussed at the last board meeting. I'm not sure but orders for these may also be taken at the May meeting.

NEXT MEETING:

The next meeting will be held Tuesday May 8 at 7:30 pm at the NYSE&G' building on Old Vestal Rd. the beginners session will not be held this month.

AT THE FIELD

KEEP YOUR TRANSMITTER OFF
UNLESS YOU HAVE A CLOTHSPIN ON

THANKS

Many thanks to Jarry Cole and friends fo the fascinating display of scale plastic models at the last meeting.

If you need opposite aileron control between the insides and outsides

One wing too heavy

If right wing heavy need left in insides
 need right in outsides

Add weight to left wing

If left wing heavy need right in insides
 need left in outsides

Add weight to right wing

If you needsame control in insides and outsides

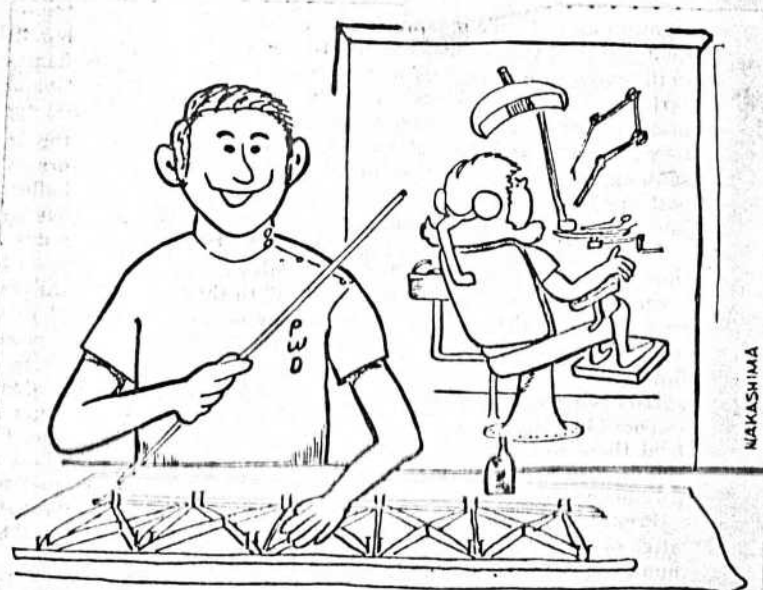

Reset one aileron - wing warp

OPEN HOUSE

Just talked with Wayne Sitler about the Open House planned for Saturday May 19. The day will be an opportunity to introduce friends, relatives and prospective new members where our field is and some aspects of our hobby. The day will consist of open flying, sessions and just a good old get together. So if you know somebody at all interested in this hobby plan on bringing him to the Open House. HE'll be able to see our flying field, see and learn a lot about RC planes and meet many of the club members. The Open House will be starting around 10am and last untill ----- . If you plan to stay awhile, bring your own food.

STRCA ACTIVITY

The first Strca event will be at Ithaca on June 10. More details will be included in the next connector.

"Is your mouth numb yet Mrs. Smith?"
