August, 1995

### KUDOS FOR VOLUNTEER MAINTENANCE CREW.

As many of you already know, considerable maintenance work was completed on our flying pavilion and picnic shed this past July. We all owe a debt of thanks to Steve Bard and his work crew for donating both their time and energies effect this project. After Steve read my "appeal" for a maintenance crew chief, he called me to volunteer! Steve, you are an inspiration to all of us and have restored my faith in humanity. I am also sincerely gratified by the volunteers that stepped forward to make the project happen. These volunteers are identified in Steve's piece elsewhere in this issue of the Connector, as I do not want to steal his thunder. On behalf of the membership, thank you all.

### FUN FLIES

This past July I attended two fun- flies. The STARS scale fun fly in Olean, N.Y., and Phelps fun fly at Phelps N.Y. I recommend the STARS scale fun fly as their field is the local municipal airport with plenty of good grass runway and sky. A nice touch to attending is that you get a couple of bucks worth of tickets to either spend on their Saturday night chicken barbecue or on a lunch of your choice from their concession stand. Also, there are always a variety of vendors to peruse. If you are a scale (or not so scale fan), going to these meets offers other benefits. One is the modelling fraternity friendships. You will meet new people and make new friends from many walks of life. And every time you return to the same meet, you usually renew those friendships.

Going to these meets also offers you the opportunity to see the variety of models other modelers are flying, their innovations etc. I speak from experience (limited as it may be), you will be impressed by many of the models you see fly. The workmanship is generally beautiful. Just make up your mind to make a good scale meet somewhere, you wouldn't regret it.

### NEW FLYING CLUB MEMBERS.

Dick Allen tells me that our flight school has "graduated" five student fliers this year (so far).. Congratulations and welcome to the flying fraternity.

### PT-19, AKA FAIRCHILD M62 PT-19 "CORNELL".

Why do I broach this topic? To shame myself into completing this model by this fall. This project (a scratch one) is slowed to a snails pace. With the advent of summer EVERYTHING seems to be taking precedent to completing this model. I am at the point where I have developed an aversion to "the building bench". It seems to emit waves of rejection, sort of like magnetic fields of flux...the rejection kind. Oh well, we will see what develops...

#### CHAIRMAN OF NOMINATING COMMITTEE

Wynn Aker has consented to chair this important committee. If you are interested in being a board member (officer) of the AGS, let Wynn know. The board positions are President, Vice President, Secretary, Treasurer and there are also two board members at large. Serving as an officer is satisfying in that you get to try out your ideas on how things can be done. And when things go right, you get a great deal of satisfaction out of knowing you helped make it easy or fun for your club members. You in fact, "advanced the ball" in this great hobby of ours. Think about it!

#### LITTER AT THE FIELD.

It has come to my attention that too often some of our members are taking stuff to the field and leaving it there. Please do not do that. It makes a mess. It is a reflection on your upbringing and an affront to the membership. If you make a mess, like empty fuel cans, rubber bands (old and fuel soaked), empty soda cans, cigaret butts, chewing gum wrappers, aluminum foil (from who knows), etc, etc...take it home with you. It doesn't take a rocket scientist to note that the garbage can is conspicuous by its absence. This is no accident...so take your stuff that you bring up back down the hill. The management and membership thank you and appreciate it, and you will receive your reward in heaven!

#### AND FINALLY, SUMMER IS STILL WITH US.

So it should be. If you haven't noticed, we have reached the half-way point (of summer) and it is rapidly fleeting, so get out there and DO IT. To all of you from me, may your flying days be bright sunny skies, gentle breezes and greased landings!

\* \* \* \* \*

#### FAST DRIVING:

The Connector editorial office has been notified that Mrs. Allen, our neighbor who lives near our entrance gate, has reported that a red or maroon car with a silver stripe has been driving fast and recklessly when entering and exiting the property. If this is you, please slow down.

**MEETING PROGRAM:** Bob Noll

The program for the August meeting will be a double header.

First, we will have a demonstration pylon race at the request of several of the newer members who have not seen a Quicke 500 pylon race.

Second, we will perform an experiment comparing an unsealed aileron hinge line with a sealed one. If successful, it should demonstrate the advantages of making your hinge lines as gap free as possible.

Don't forget that these summer programs at the field start at 7 PM.

**ADVANCED FLIGHT SCHOOL:** Bob Noll

An advanced flight school will start Wednesday, August 16, at 5:30 PM at the club field. The school will be held weekly and is the result of several requests for flight training beyond the basic school which has just been concluded.

Subjects that will be covered will be:

- transmitter set-up and use of dual rates
- CG location and adjustment
- proper surface deflections
- performing stall turns and spins
- aileron differential and performing multiple rolls
- loops, split S's and immelmans

If you are ready to take the next step beyond the basic school, come and join the group.

**MORE THANKS:** Steve Bard

In alphatic order by last name: Mr Todd Bruce, Mr. Charles Krapf, Mr. Dave Lewis and Mr. Anthony Wyziak earned special commendation for their exceptional effort and exceptional accomplishment. These gentlemen worked thoroughly and conscientiously replacing rotten boards and painting over unsightly blemishes at the clup pavilion and the tractor shed. The world is a more beautiful place for what these gentlemen did, especially the AGS Field part of the world.

**1995 AGS CALENDAR:** Dave Lewis

Sept. 17	Sunday	Pylon races	Bob Noll	754-5279
Sept. 23,24	Sat & Sun	Fall Float Fly	Terry Terrenoire	748-8146
Oct. 8	Sunday	Pylon Races	Bob Noll	754-5279
Nov. 12	Sunday	AGS Field Closing		
Dec. 2	Saturday	AGS Christmas Party	To Be Announced	

**ANOTHER EVENT:**

August 12,13 Binghamton Aeros Giant Scale Meet, Chenango Bridge Airport, Chenango Bridge, NY
