THE NEWSLETTER OF THE AEROGUIDANCE SOCIETY

Editor: Ralph Jackson

Volume 11, Number 3

March, 1978

THE PREZ SEZ: Len Wallace

March is here already, but so is the winter snow and cold weather. I guess we're all ready for that big warm up that is a little late in coming this year.

As our main winter alternative to flying is building, let's keep at it. I, for one, can use the extra building time as I picked a very ambitious project for the spring and Project night. It's a scratch built 60 - powered stand off scale jet.

The irony of this system is that the longer we build, the rustier our flying gets. So don't forget to have something ready to practice up on before you try your hand (or thumbs) on your new pride and joy you spent all winter building.

I talked with Bill Webb last week. The weather in Ohio has been milder than ours and hasn't curtailed Bill's flying, but 16 stitches in his right hand has. He reached through the prop (a 10-6 plastic) to set the needle valve. Bill reports he feels a bit foolish, but the hand will be fine.

I haven't talked to anyone who attended the WRAM show last month. How about those of you who attended filling us in at the coming meeting. Bring your pictures, handouts you may have picked up etc.

As you all know, Saturday, March 11 is the annual AGS Dinner Dance. I hope you all plan to attend. If, for some reason you did not receive your invitation, decide to attend at the last minute (on the 11th) or bring a guest, call me or Bill Sebesta and we will fit you in. We had a great time last year and look forward to the same or better this year.

See you all at the Dinner Dance and/or the coming meeting.

MODEL'S CORNER: Mary Wallace 748-7139

The next Models meeting will be held on Friday, March 10, at 8:00 pm at the home of Barb Sitler, 302 Beckwith Avenue, Endwell. Sharon Grodevant will be heading the project activities for this month.

MEETING PROGRAM: Don Godfrey

The March 14 meeting programs will be:

- Bill Sebesta: Mini Flite Box
- Bob Noll: Demonstrating the art of Fiberglass and Resin application.

7 servos (6-KPS 15, 1 KPS 18) , Two receivers. \$350

Call Hale Wallace 862-9742

Also miscellaneous engines, kits and planes for sale.

PROJECT DAY: Roger Sanwald

Project Day will be Sunday afternoon, April 23, 1 - 6 pm at the Hooper School gymnasium. The events that are scheduled will include something for everyone. There will be a Swap Shop for those who are looking for bargains to buy from those who have items to sell. A building demonstration will be followed by a raffle of the completed plane (Quickie 500). There will also be a display of several Quarter Scale models.

All club members should plan to enter their planes (as many as you wish) in competition for trophies in many categories. The more planes we have, the better Project Day it will be.

An AMA movie, a club display, and a bake sale should make the day even more fun for modelers, potential modelers, their families and friends.

So, mark Sunday, April 23rd on your calendar. It should be a super event for R/C enthusiasts.
